

What I should know already:

- ✓ Life existed before your grandparents were born.
- ✓ Millions of years ago, dinosaurs lived. Evidence of this was found by Mary Anning who discovered fossils.
- ✓ Climate is the general weather conditions that are typical of a region.

What will I know by the end of this topic?

- Pre-history refers to the time in the past before writing was used to record events.
- Pre-history in Britain is split up into 3 ages: Stone Age, Bronze Age and Iron Age.
- The Stone Age is split into three periods: the Palaeolithic, Mesolithic and Neolithic periods.
- The Stone Age began when tools were made from stone and ended with the introduction of metal tools.
- Humans survived by using sharp stone tools to kill animals.
- Dead animals provided food to eat and skins to keep warm. Their bones were used for making tools.
- Evidence of the Stone Age includes discoveries of: cave paintings, early tools such as flints, fire hearths, settlements such as Skara Brae.
- Man evolved over the Stone Age period.
- At the end of Palaeolithic Age, sea levels rose and Britain turned into an island.
- During the Neolithic Age, people began to settle down in one place.
- During the Bronze Age, people lived in permanent settlements, farmed the land and reared animals. They had small monuments: Round Burrows or Cairns to bury their dead. Stone circles may have been used for ceremonial purposes.
- During the Iron Age, the population grew.
- Pressure on land led to the country being divided up into territories. By the late Iron Age, there were named tribes.

Historical Skills and Enquiry

- Explore what prehistory is and explain how historians find out about the past. Understand the terms BC and AD.
- Chronologically order the three stages of the Stone Age onto a time line. Sequence Iron Age and Bronze age within this timeline.
- Understand significant events of Palaeolithic, Mesolithic and Neolithic periods.
- Explain how Britain changed during the Palaeolithic period with reference to a changing coast line and human evolution.
- Compare how and why settlements changed from the Palaeolithic period to the Mesolithic period, making links to the effect of these.
- Explore and understand some aspects of change in Britain from the Mesolithic period to the Neolithic period, including an introduction of agriculture.
- Use evidence to reconstruct life and compare how aspects changed from the Stone Age to the Bronze Age to the Iron Age.
- Describe the features of the settlement of Skara Brae and changes in settlements and the effect of this.
- Study Stone Age artefacts, including cave paintings and tools, and explain what their uses were, building a picture of life in the period.
- Ask questions and find out the answers about the Stone Age, presenting understanding using evidence to support ideas.
- Understand the religious beliefs of the Iron Age.

Stone Age c. 800,000 BC - 2,500 BC

c. 800, 000 BC - 10, 500 BC: Palaeolithic Stone Age

Old or 'Ancient' Stone Age: Neanderthals and modern humans used ancient tools and simple ways of living to survive the Ice Age. Hunter gatherers, they lived in the open or caves.

c. 2,300 BC - 800 BC

c. 2,300 BC: Bronze Age begins when the Beaker people began to arrive in Britain.

Bronze Age

c. 800 BC: The Iron Age begins

c. 10, 500 BC - 4, 000 BC **Mesolithic Stone Age**

c. 4, 000 BC - 2, 500 BC

Neolithic Stone Age

New Stone Age: from the start of farming

including land clearance and the keeping of

animals. This lasted till the first use of metal.

Middle Stone Age: from the end of the Ice Age, as the climate got warmer, to the start of farming. Humans would demonstrate a variety of ways to gather food including hunting and fishing. They lived in tipi style huts covered in animal skins.

c. 55-54 BC:

Julius Caesar first invades Britain.

c. AD 43: The Romans conquer Britain. This marks the *end of the* Iron Age.
